PROFILE SUMMARY

Data and analytics professional with 3.5+ years of experience delivering 15+ analytics solutions across supply chain and finance, including KPI systems, Power BI dashboards, and SQL-based data pipelines. Led projects improving operational efficiency by up to 35% and supported \$500K+ in new client engagements. Currently pursuing an MS in Business Analytics (4.0 GPA) in Boston, MA, with experience in Python, Azure, and API-driven analytics systems.

PROFESSIONAL EXPERIENCE

University of Massachusetts Boston – Boston, MA

Graduate Assistant – Patent Novelty & Innovation Research

Sep 2025 - Present

- Collaborated with the Dean of the College of Management and external stakeholders to build a data-driven patent novelty evaluation platform to support early-stage idea screening for students and faculty.
- Designed and implemented a full-stack MVP using FastAPI, Python, Next.js, and SQLite. Enabled structured intake of 10+ idea attributes and real-time similarity analysis.
- Integrated live patent retrieval through the USPTO PatentsView API, querying thousands of public patent records and returning the top 3–5 most similar results per submission.
- Developed a lightweight SQL-based logging system capturing 100% of search requests, including CPC usage, result counts, and backend execution mode.
- Tested system performance and response latency, iterating on backend logic based on user behavior and load patterns to prepare for a student pilot launch.
-

Cypress Atlantic — Boston, MA

Data & Business Analytics Intern

Jun 2025 – Sep 2025

- Architected automated financial analytics pipelines integrating POS sales, OCR invoice data, and cloud storage to support SMB acquisition analysis across 2+ businesses.
- Engineered Python workflows using Toast POS, OCR software, and Google Drive APIs to process 24+ months of transactional data into monthly financial summaries.
- Automated ingestion of 10–20 vendor invoices per month, extracting line-item COGS and totals with >95% structured data accuracy.
- Created 6+ Power BI dashboards tracking revenue, COGS, labor, and operating expenses to surface margin drivers and cost leakage.
- Identified 0.5–1% revenue variance across POS and reporting systems using reconciliation logic and business-date alignment.

Thorogood – Bangalore, India

Manager – Data and Analytics Consultant

Jun 2023 – Jun 2024

- Led a cross-functional team across India and the U.S. in designing a scalable data pipeline, reducing supply chain bottlenecks by 20% through optimized distribution routes and logistics insights.
- Identified performance blind spots in raw supply chain data and introduced 8+ new KPIs, improving visibility into SKU movement, fulfillment lag, and shelf performance.
- Supervised and mentored 3 junior analysts in developing 5–10 interactive Power BI dashboards and full-stack architecture; improved visualization capabilities for finance and supply chain teams.
- Conducted quarterly performance reviews to junior consultants and training feedback sessions, contributing to faster onboarding and enhanced team productivity.

Thorogood – Bangalore, India

Data and Analytics Consultant

Dec 2020 – Jun 2024

- Implemented 15+ scalable analytics solutions for clients in Supply Chain and Finance industry, enabling up to 35% faster decision-making and reducing operational bottlenecks.
- Represented the company at 3 international marketing events, showcasing data solutions to over 150 professionals; secured 10+ high-quality business leads per event.

- Optimized 5+ high-impact client proposals, contributing to new contract acquisitions; led 10+ recruitment cycles, increasing team retention by 15%.
- Built tracking systems for key KPIs including inventory levels, planogram compliance, and demand fulfillment, enabling data-driven warehouse and stock optimization.

EDUCATION

Master of Science in Business Analytics (MSBA) | *University of Massachusetts, Bos*

Sep 2024 – Present
CGPA – 4.0

- **Specialization:** Supply Chain Management.

Bachelor of Engineering (B.E.) in Electrical and Electronics Engineering | *RV College of Engineering*

Sep 2016 – Oct 2020

CERTIFICATION

- Microsoft Certified: Power BI Data Analyst Associate

Sep 2022 – Sep 2024
- Python Certification

Mar 2025
- R Programming essentials

Sep 2024

ACHIEVEMENT

- Supply Chain Project - Passion Award

Oct 2022
- **Awarded the Passion Award** for leading the development and deployment of an automated end-to-end system that delivered real-time insights across all supply chain streams, enhancing client operations and efficiency.

Research/ Projects

Spotify Top Songs Dashboard (Power BI)

Designed a Power BI dashboard to analyze top-performing songs of 2023 using Onyx Data. Built KPIs like energy, popularity, and stream counts, benchmarked against genre averages to uncover listening trends and outliers. Utilized DAX, Power Query, and custom visuals for advanced insight delivery.

TECHNICAL SKILLS

Languages & Tools: SQL · Python · R · DAX · Power BI · Tableau · Alteryx · Advanced Excel

Cloud & Platforms: Azure Data Factory · Azure Databricks · SSRS

Data Engineering: ETL · Data Modeling · Data Warehousing · Pipeline Automation

Analytics & BI: KPI Design · Dashboarding · Forecasting · Cost Optimization

Supply Chain: Inventory Planning · Demand Forecasting · Planogram Analysis

Collaboration: Stakeholder Engagement · Cross-Functional Leadership
